DETAILED ACTION

1. Claims 1-33 are presented for examination.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Maurice Pirio (Reg No. 33,273) on 02/29/2008.

The application has been amended as follows:

In the claims:

Please cancel claim 33. Please amend claims 5-6, 10, and 14-15 as follows:

5. (Currently Amended) The method of claim 1 wherein when the set jump thread is running not the same thread that is currently executing, but the set jump thread is executing, notifying the set jump thread of the inter-thread long jump.

6. (Currently Amended) The method of claim 1 wherein when the set jump thread is running not the same thread that is currently executing, but the set jump thread is executing, directing the set jump thread to enter a known state prior to setting the state of the set jump thread.

10. (Currently Amended) A system having a processor for performing an inter-thread long jump, the system comprising:

a processing component;

a component executing on the processing component that determines whether a set jump thread that set a set jump location is the same thread that is currently executing; and

a component executing on the processing component that, when the set jump thread is not the same thread that is currently executing, sets a state of the set jump thread to transfer control to the set jump location.

14. (Currently Amended) The system of claim 10 wherein when the set jump thread is ~~running~~ not the same thread that is currently executing, but the set jump thread is executing, notifying the set jump thread of the inter-thread long jump.

15. (Currently Amended) The system of claim 10 wherein when the set jump thread is ~~running~~ not the same thread that is currently executing, but the set jump thread is executing, directing the set jump thread to enter a known state prior to setting the state of the set jump thread.

33. (Cancelled)
